
If you're in the market for a new bass or piano plugin, we recommend checking out Native Instruments Scarbee Pre Bass and Piano. This plug-in is modeled after the amazing sounds of an old Fender amp and a beautiful Steinway upright piano. Along with realistic audio modeling, these plugins also provide an impressive suite of features that allow you to get creative with your tracks. These include EQ, chorus, delay effects and more! The best part? These plugins are priced very affordably at \$149 each.

Native Instruments Scarbee Pre Bass and Piano are available at the NI Reverb online store.
